

## Repeater

### Advantages

- ▶ Inexpensive control of large outputs
- ▶ Easy to install
- ▶ Can be combined with many different remotes and dimmers

▶ Works with all Halemeier PWM dimmers

- ▶ Works with MultiSwitch?
- ▶ Not combinable with dimmable electronic ballast
- ▶ Not combinable with Smart.home

### Features

- ▶ Any number of repeaters can be connected in parallel in order to achieve the desired overall performance. Each repeater requires a control signal from the dimmer/switch and sufficient ballast power to control the connected luminaires

### Order information

### Accessories\*

Repeater 12 Volt DC	30 263 07
Repeater 24 Volt DC	30 263 08

\* Further accessories in section Switch systems/Ballasts and leads

### Technical details

For use with: LED lights  
 Max. switching power: 12 Volt DC-36 W  
 24 Volt DC-72 W  
 Test mark and symbols: CE, RoHS, Energy Star  
 Line lengths: see drawing

### Dimensional drawing / installation
